MADE IN
GERMANY

SINCE 1912

Progress as tradition

JUNG stands for pure design and future-oriented solutions worldwide. Innovation, passion and precision have been guiding our product developments for more than 100 years. Light, shading, room climate, energy, security, door communication and multimedia – our systems provide the appropriate solution for every requirement.

With 1,400 employees we are present on 5 continents in around 70 countries with 20 subsidiaries and independent sales and partner organisations. Whether private, commercial or hotel construction: Architects and planners worldwide place their trust in the innovative solutions from JUNG. Our building technology can be found in the Reichstag in Berlin as well as in the Hermitage in St. Petersburg or the Shangri-La Hotel in Singapore.

We consciously combine this internationality with close ties to the headquarters of our family business in Schalksmühle. We develop and manufacture components for classic electrical installations as well as intelligent systems for building technology. Flow production, small series or manufacture: Our modern production methods meet the highest requirements.

WE ARE JUNG:

1912 Medium-sized third generation family company

“Made in Germany” for more than 100 years

Around 1,400 employees

20 subsidiaries and over 70 agencies worldwide

Global and versatile

JUNG offers a wide range of solutions for the British market. The design aspirations and the ambition to implement advanced solutions for the classic electrical installation all the way to automated building technology expertly come together at JUNG. Our switch designs and applications can be tailored to the individual needs of the user. Around the world, owners, planners and architects trust the quality from JUNG.

A 550 in matt snow white

A 550

This JUNG switch range impresses with its striking and minimalist design. Made of unbreakable thermoplastic, the A 550 has a clear design language.

A 550 in black

Sockets in A 550

SOCKET 13 A

in white

SOCKET 5 A

in aluminium look

SOCKET 13 A, SWITCHABLE

in matt anthracite

SOCKET 13 A, SWITCHABLE
WITH INDICATOR LAMP

in black

A balanced combination with optimal proportions for the ratio of insert and frame: concentrated on the essentials, the technology for the British connection now also impresses in the A 550 switch range.

Versatile technology in A 550

ROTARY DIMMER

SWITCHES / PUSH-BUTTONS

in aluminium look

UNIVERSAL TIMER BLUETOOTH

in matt anthracite

STANDARD CENTRE PLATE 2-GANG

in black

JUNG technology for the British electrical standard in the A 550 switch range covers all important areas of modern installations – from simple switches via dimmers to timers with app integration. With the Clever Config app, one can set and operate the Bluetooth-compatible devices using a smartphone: for

convenient control of functions, display of values and statuses, setting of timer controls and parameters such as shut-off delay or brightness. All A 550 covers are made from breakproof thermoplastic and have a clear design language.

A FLOW in black

A FLOW

A harmonious shape and breakproof thermoplastic: with its design, the switch range blends confidently into different interior styles.

Sockets in A FLOW

**SOCKET 13 A, SWITCHABLE
WITH INDICATOR LAMP**

in matt anthracite

Young, modern and adaptable: A FLOW remains stylish even if tastes change. With this switch range, electrical installations get a light and modern design.

Versatile technology in A FLOW

2-GANG PUSH-BUTTON

in white

CENTRE PLATE

in black

ROTARY DIMMER

in aluminium look

UNIVERSAL TIMER BLUETOOTH

in matt anthracite

With the JUNG A FLOW range, the electrical installation has a harmonious effect – from conventional to interlinked building technology. Control lighting, set the desired temperature and operate blinds: the JUNG components make it all very easy. Like the timer, they have a flat design and a shallow installation depth,

which makes those products very installation-friendly. The Universal timer Bluetooth is a cover for all system inserts for light and shading control. You control it either manually with the two rockers or with a smartphone using the Clever Config app.

A FLOW in matt anthracite

LS Design
in classic brass

LS Design

This switch range is based on a clear form and high flexibility. Numerous combinations are possible thanks to a wide range of colours and materials.

Sockets in LS Design

SOCKET 13 A

in stainless steel

G + I SOCKET

ROTARY DIMMER

in antique brass

UNIVERSAL TIMER BLUETOOTH

in classic brass

Timers, rotary dimmers or classical switches: LS Design covers all areas of a modern electrical installation according to the British range.

The possibilities are numerous. Even conventional switches in LS Design impress with their simple operation and high-quality appearance.

British Standard Support

Technology, that supports

JUNG offers numerous components for building technology that fit into the widely used flush-mounted boxes. This is made possible by the adapter frame: it is the connection between box and insert – with this, existing boxes can simply continue to be used.

Combining JUNG products with the adapter frame

INSTALLATION WITH SUPPORT RING 71 x 71 MILLIMETRE AND ADAPTER FRAME

Ideal for renovations: JUNG technology with adapter frame. With this method, installers can install versatile building technology, without extensive restoration work or a reconfiguration of the electrical installation under the plaster.

WALL BOX 1-GANG AND ADAPTER FRAME

INSERTS WITH SUPPORT RING 71 x 71 MM

With the adapter frame, installers can install different components such as the JUNG USB socket or a Universal timer Bluetooth without any great effort. The adapter frame compensates for the different dimensions between

wall box and insert. In this way, the existing flush-mounted installation can continue to be used and more versatile JUNG technology fits into the existing British wall box.

British 1-gang socket

BRITISH RANGE: INSTALLATION WITH SUPPORT RING 80 x 80 MILLIMETRE

- 1 Wall box as traditional BS4662
- 2 Flush-mounting insert with support ring 80 x 80 mm
- 3 Design frame
- 4 Cover

Sockets are the basis of every electrical installation. For a smooth and fast installation, JUNG supplies British sockets from the factory with the appropriate support ring. The A 550, A FLOW and LS Design frames lend the installations a high-quality appearance.

WALL BOX 1-GANG

British 1-gang wall box

INSERTS WITH SUPPORT RING 80 x 80 MM

Socket insert, 13 A
ref. no.: BS252IEINS

Switched socket insert, 13 A
ref. no.: BS217IEINS

Switched socket insert, 13 A
ref. no.: BS217IKOEINS

Socket insert, 5 A
ref. no.: BS217I-5EINS

Switched socket insert, type G + I
ref. no.: GI217IWEINS

Fused connection unit
ref. no.: BS 2190 CU KO EINS

The well-thought-out modular system makes it possible to install a socket and covers into a British wall box without complication. The

large support ring in the dimensions 80 x 80 millimetre provides the basis for every electrical installation in the British connection system.

British 2-gang socket

BRITISH RANGE: INSTALLATION WITH SUPPORT RING 80 x 140 MILLIMETRE

- 1 Wall box as traditional BS4662
- 2 Flush-mounting insert with support ring 80 x 140 mm
- 3 Design frame
- 4 Cover

For the installation of a two-gang wall box in the British system, JUNG offers various 2-gang sockets with a large support ring. In combination with the design frames from the JUNG A 550, A FLOW and LS Design, the electrical installation is given a high-quality appearance.

WALL BOX 2-GANG

British 2-gang wall box

INSERTS WITH SUPPORT RING 80 x 140 MM

Switched socket insert, 13 A
ref. no.: BS2172KOEINS

Switched socket insert, 13 A
ref. no.: BS2172EINS

Socket insert, 13 A
ref. no.: BS2522EINS

Modern design for a double electrical installation: JUNG makes a special appearance possible in interior design with the A 550, A FLOW or LS Design. In this way, the socket

inserts with the large support ring disappear behind high-quality covers in the JUNG design. The holes in the support ring provide a reliable guide for the design frame on the socket insert.

Discover the variety

The digital sample case for travelling: Whenever and wherever you like, JUNG products and solutions can be placed virtually in the room with AR Studio. Using the QR code, the app is installed quickly and simply. After the installation, simply print out the experience marker and attach it to the location where the switch will be installed later. AR Studio then displays the selected JUNG product in the live image of your smartphone.

Catalogue

For a complete overview of the JUNG products and solutions please use the information from the online catalogue at jung.de/en/online-catalogue. On the following pages you will find an excerpt of JUNG products and solutions, which are suitable for British wall boxes.

Switch inserts

Push-button inserts

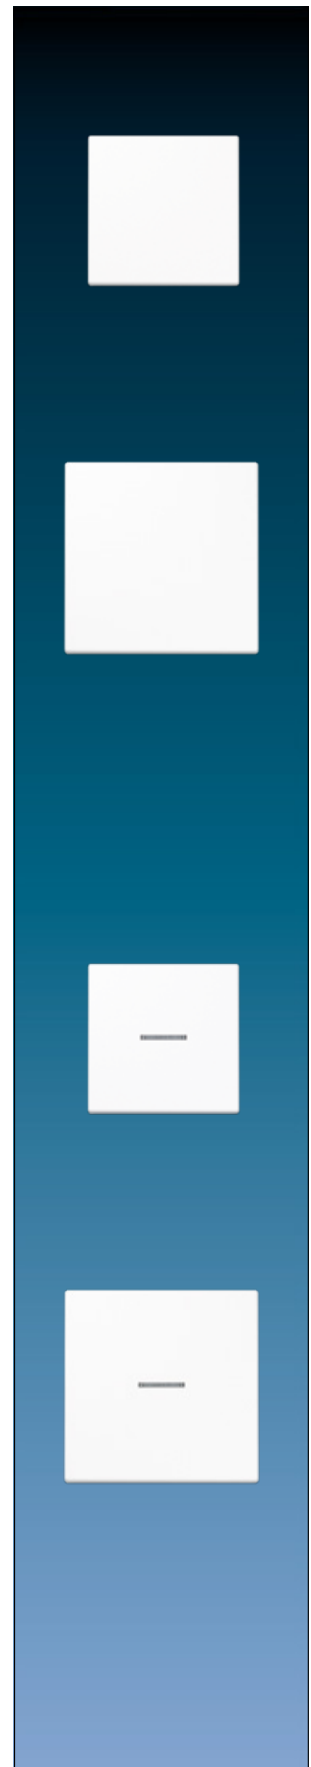

**Installation note: Use adapter frame (ref.-no.: BS 1980 APM)
for installation of JUNG inserts into BS wall boxes.**

Ref.-no.

TV-FM socket outlet insert

screwless terminals

for cable TV and SAT distribution

Frequency range 5 ... 2400 MHz without gaps on both outputs.

Housing: torsion-resistant, passivated diecast zinc

Loop through outlet

GEDU 15

Loop through outlets can also be used in tree networks. The last loop through socket installed in a trunk or stub line must be terminated by terminating resistor R 75.

Note on the use of loop through outlets GEDU 10 and GEDU 15:

In a main line with e.g. 7 subscribers the first 4 TV sockets will be GEDU 15 and the remaining ones will be GEDU 10. In this way all sockets will have approximately the same signal strength.

Technical data

IN – OUT (throughpass)

Frequency range: 5 ... 2150 (2400) MHz

Attenuation: 1.0 dB

IN – TV (IEC male)

Frequency range: 5 ... 2150 (2400) MHz

Attenuation: 15.0 dB

IN – RF (IEC female)

Frequency range: 5 ... 2150 (2400) MHz

Attenuation: 15.0 dB

Isolation

OUT – TV / RF: VHF, UHF / SAT: 38/30 dB

TV – RF: VHF, UHF / SAT: 24/24 dB

DC through:

no

PL MAGNET 01

LED spotlight Plug & Light

white	PL S1 D05 WW
white – black	PL S1 D05 WW SW
black	PL S1 D05 SW SW
aluminium – black	PL S1 D05 AL SW

Product characteristics

- Dimming with suitable LED dimmer at constant colour temperature of 2700 K • Symmetrical optics, beam angle of 35° • Flicker-free light over the entire dimming range • Light attachment can be changed during ongoing operation • Adjustable anti-glare ring via 3 latch positions (5, 10 and 15 mm) • Swivelling by 90°
- Stepless rotation through 360°

Technical data

Rated voltage:	DC 12 V SELV
Power consumption:	5.6 W
Connection mode:	electrical coupling via gold-plated sliding contacts
Protection class:	III
Luminous flux:	390 lm
Colour temperature:	2,700 K
Colour rendering index:	typical 85
Beam angle:	35 °
Diameter:	42 mm
Length without anti-glare ring:	80 mm
Length with anti-glare ring:	85 ... 95 mm
Housing material:	aluminium lacquered / plastic
Energy efficiency class:	G

This luminaire contains built-in LED lamps, which cannot be replaced.

Friends of Hue switch set

including mounting plate, adhesive film and fastening screw

- Smart switch for wireless remote control of Philips Hue lamps
- For switching, dimming and controlling individual light scenes
- For residential use only
- Mounting on flush box according to EN 60670-1, screw fixing on walls or adhesive fixing on smooth, even surfaces (glass)
- Battery-free device without external power supply
- Transmitting energy is generated from mechanical energy of actuation (energy harvesting)
- Encrypted transmission with device-specific code
- Wireless standard ZigBee Green Power, compatible with Friends of Hue and Apple HomeKit
- Automatic range extension via Philips Hue lamps
- Simple commissioning and configuration via Philips Hue app and Hue Bridge V2 or higher

Technical data

Radio frequency:	2.402 ... 2.480 GHz
Transmission range	
in free field:	up to 175 m
in buildings:	approx. 20 m
Transmitting power:	7 dBm / 5 mW
Ambient temperature:	-5 ... +45 °C
Stora/transport temperature:	-25 ... +65 °C
Atmospheric humidity:	0 ... 95 % (no condensation)

A range

1704 ESE

Intended use

- Operation with suitable cover of the LB Management

Operation with neutral conductor:

- Switching of incandescent lamps, HV halogen lamps, electronic or inductive transformers with halogen or LED lamps, switchable or dimmable HV-LED or compact fluorescent lamps

Operation without neutral conductor:

- Switching of incandescent lamps, HV halogen lamps, electronic or inductive transformers with halogen or LED lamps, dimmable HV-LED or compact fluorescent lamps

Product characteristics

- Switch-on via bulb-preserving soft start
- Connection of satellite units possible
- Electronic short-circuit protection with permanent switch-off after 7 seconds at the latest
- Electronic over-temperature protection
- Test operation for functional test

Operation with neutral conductor:

- Device is powered via line conductor and neutral conductor, therefore there is no leading edge phase control or trailing edge phase control

Operation without neutral conductor:

- Device is powered via the line conductor and the connected load and therefore works in the leading edge phase control or trailing edge phase control principle
- Automatic or manual setting of the operating mode suitable for the load
- Display of the set operating mode by means of LED

Ref.-no.

Universal centre plate

for insert "blinds" ref.-no.: 1731 JE

for inserts "light" ref.-no.: 1701 SE, 1704 ESE, 1711 DE

Intended use

- Manual and time-controlled operation of Venetian blinds, shutters, awnings or lighting
- Operation with switch, dimmer or blinds insert or satellite insert 3-wire

Product characteristics

- Activation of blinds/shutters, with blinds insert
- Switching and dimming of lighting, with switch or dimmer insert
- Ventilation position of the blind/shutter can be saved, with blinds insert
- Switch-on brightness of lighting can be saved, with dimmer insert and DALI push-button controller
- Disabling function
- 2 switching times can be saved, which are repeated in a 24-hour cycle

Standard timer with display

for insert "blinds" ref.-no.: 1731 JE

for inserts "light" ref.-no.: 1701 SE, 1704 ESE, 1711 DE

Intended use

- Manual and time-controlled operation of Venetian blinds, shutters, awnings or lighting
- Operation with switch, dimmer or blinds insert or satellite insert 3-wire

Product characteristics

- Real glass front
- 6 sensor buttons
- Current time can be saved as switching time, quick programming
- Automatic summer/winter time changeover, can be switched off
- Switching at sunrise and/or before sunset (astro function) adjustable for 18 countries
- Astro time shift for sunrise and sunset
- Disabling function
- Display switches off after 2 minutes, permanent indication of the current time possible
- Activation of blinds/shutters, with blinds insert
- Programming of one up time and one down time each for the parts of the week Mo-Fr and Sa+Su
- Ventilation position of the blind/shutter can be saved, with blinds insert
- Switching and dimming of lighting, with switch or dimmer insert
- Programming of two memory areas with one switch-on and one switch-off time each for the parts of the week Mo-Fr and Sa+Su
- Switch-on brightness of lighting can be saved, with dimmer insert and DALI push-button controller

Universal timer Bluetooth

for insert "blinds" ref.-no.: 1731 JE

for inserts "light" ref.-no.: 1701 SE, 1704 ESE, 1711 DE

Intended use

- Manual and time-controlled operation of Venetian blinds, shutters, awnings, lighting or fans
- Operation and programming with smartphone in combination with Clever Config App via Bluetooth
- Operation with switch, dimmer or blinds insert or satellite insert 3-wire

Product characteristics

Functions directly via cover

- Operation of blinds/shutters and lighting
- Activating / deactivating the disabling function
- Activating / deactivating automatic operation
- Running time and ventilation position of the blind/shutter can be saved
- Switch-on brightness or switch on to last brightness (with dimming insert) can be saved
- Night mode

Functions via Clever Config App

- Operation of blinds/shutters and lighting with status feedback
- Display of current blind/shutter position, dimming position or switching state
- Programming of up to 40 individual switching times
- Blind and slat positions or switching and dimming values can be saved for each switching time
- Possible to copy switching times to other universal timers Bluetooth
- Switching at sunrise and/or before sunset (astro function)
- Astro time by means of geolocation
- Astro time shift can be set for each switching time
- Automatic summer/winter time changeover, can be switched off
- Random function
- Automatic date and time update when connecting with smartphone
- Code request for protection for time programs and configuration possible
- Save a ventilation position, blind/shutter running time, slat change-over time and change-over time for direction change
- Switch to inverse operation for Venetian blind inserts possible
- Maximum brightness and minimum brightness for dimming insert can be set
- Sun protection and twilight function possible via optional brightness / temperature sensor
ref.-no.: 1792 HT BT

Technical data

Ambient temperature:	-5 ... +45 °C
Stora/transport temperature:	-20 ... +70 °C
Accuracy per month:	± 10 s
The time is updated with every connection to the app.	
Power reserve:	approx. 4 h
Radio frequency:	2.402 ... 2.480 GHz
Transmitting power:	max. 2.5 mW (class 2)
Transmission range:	typical 10 m

Universal automatic switch 1.1 m

for inserts "light" ref.-no.: 1701 SE, 1704 ESE, 1711 DE

Intended use

- Automatic switching of lighting depending on the thermal movement and ambient brightness
- Operation with flush-mounted insert for switching or dimming or satellite insert 3-wire

Product characteristics

Functions directly via cover

- Extension of the detection area in combination with 3-wire satellite insert
- Continuous on, Continuous off
- Operation with 2-wire or 3-wire satellite insert, rotary satellite insert or push-button
- Dimming insert can be dimmed via satellite insert
- Resetting to factory setting
- Screen for limiting the detection area

Functions via Clever Config App

- Brightness threshold adjustable
- Adjustment of the sensitivity of the PIR sensors
- Run-on time adjustable
- Continuous on, Continuous off
- On or Off for 0.5 - 5 hours
- Switch-off warning
- Dynamic run-on time
- Presence simulation
- Alarm function
- Timer function
- Operating lock
- Reduced basic sensitivity
- Automatic summer/winter time changeover
- Test operation
- Programming of up to 16 individual switching times

In combination with a switch insert

- Short-time operation

In combination with a dimmer insert

- Switch-on with last brightness or saved switch-on brightness
- Adjusting the minimum brightness
- Adjusting the maximum brightness
- Night light function

System inserts

Ref.-no.

Room thermostat insert

with sensor connection
for displays ref.-no.: .. 1790 D ..

1790 RTR

Intended use

- Switching of electric underfloor heating systems and electrothermal valve drives
- Operation with room temperature controller cover of the LB Management

Product characteristics

- Pulse width modulation (PWM) or two-point control (on/off)
- Enables connection of a remote sensor (ref.-no.: FF NTC 7.8)
- Input for switching to cooling mode
- Interrupts the heating process after 60 minutes (overheating protection of a heater)

Technical data

Rated voltage:	AC 230 V ~
Mains frequency:	50/60 Hz
Stand-by power depending on the cover:	approx. 0.1 ... 0.5 W
Switching current 230 V AC1:	10 mA ... 16 A
Connected load:	max. 3,600 W
Connection	
single wire:	1 x 0.5 ... 4.0 mm ²
	2 x 0.5 ... 2.5 mm ²
stranded without ferrule:	1 x 0.5 ... 4.0 mm ²
	2 x 0.5 ... 2.5 mm ²
stranded with ferrule:	1 x 0.5 ... 4.0 mm ²
	2 x 0.5 ... 1.5 mm ²
Ambient temperature:	-5 ... +45 °C

External temperature sensor

for room thermostat ref.-no. 1790 RTR, TR D .. 1790 ..
spare part for floor thermostat ref.-no. FTR 231
The sensor cable can be connected using a bifilar cable of 1.5 mm²
in diameter that is suitable for mains voltage.
When installed in a cable duct or near high voltage current cables,
a shielded cable must be used.

FF NTC

Technical data

Dimensions (Ø x H):	7.8 x 20 mm
Cable length:	4 m (can be extended up to 50 m)
Protection level:	IP 67

**Installation note: Use adapter frame (ref.-no.: BS 1980 APM)
for installation of JUNG inserts into BS wall boxes.**

Ref.-no.

Display standard for room temperature control

for room thermostat insert ref.-no.: 1790 RTR

for switch inserts ref.-no.: 1701 SE, 1704 ESE

Intended use

- Manual and time-controlled regulation of the room temperature
- Operation with room thermostat insert or switch insert

Product characteristics

- Real glass front
- 6 sensor buttons
- Timer with three memory areas
Comfort and ECO time for Mo-Fr and Sa-Su in each memory area
- Setting a comfort, ECO, cooling and frost protection temperature
- Current time can be saved as switching time, quick programming
- Automatic summer/winter time changeover, can be switched off
- Illuminated segment display for easy reading
- Operating lock
- Optimised heating up (temperature is reached at the set time), can be switched off
- Adaptation to valves (normally open or normally closed)
- Cooling mode possible
- Supports internal and external temperature sensor
- Temperature drop detection (call-up of frost protection temperature when window is open)
- Offset adjustment (correction value for measured temperature)
- Controller output working method: pulse width modulation (PWM) or two-point
- Valve protection function (once a week opening and closing of valve, on Saturdays at 11 a.m.)
- Interrupts the heating process after 60 minutes for 5 minutes
- Heating / cooling, switch-over via insert input
- Display switches off after 2 minutes, permanent indication of set/actual temperature or current time possible

Technical data

Ref.-no.

Room thermostat (1-way NC contact) 230 V

for covers ref.-no.: .. 1749 ..

RTR 230

Intended use

- Electronic room thermostat for controlling electrothermal valve drives for 230 V ~ (e.g. ref.-no.: TSA 230 NC WW)
- Room temperature control in enclosed areas
- Installation in flush box according to EN 60670-1

Product characteristics

- Manually setting a comfort temperature
- Temperature limit of comfort temperature can be set
- Internal temperature sensor
- Noiseless switching
- Controller output working method: pulse width modulation (PWM)
- Operation with valve type "normally closed"
- Valve protection function (once a week opening and closing of valve)

Technical data

Connected load:	20 W
Stand-by power:	< 0.5 W
Temperature range:	approx. +5 ... +30 °C
Mounting height:	1.50 m
Number of valve drives:	1 ... 10
Ambient temperature:	-5 ... +45 °C
Stora/transport temperature:	-25 ... +70 °C

Temperature Management

Ref.-no.

Room thermostat (heating/cooling) 230 V
for covers ref.-no.: .. 1749 ..

RTR 231

Intended use

- Electronic room thermostat for controlling electrothermal valve drives for 230 V ~ (e.g. ref.-no.: TSA 230 NC WW)
- Room temperature control in enclosed areas

Product characteristics

- Manually setting a comfort temperature
- Temperature limit of comfort temperature can be set
- Manually switching off the temperature control
- Input terminal for activation of reduction temperature (ECO) via central clock
- Input terminal for activation of cooling via central control
- Manual activation of cooling
- Internal temperature sensor
- Frost protection function
- Noiseless switching
- Temperature drop detection (call-up of frost protection temperature when window is open)
- Controller output working method: pulse width modulation (PWM) or two-point
- Adaptation to valves (normally open or normally closed)
- Offset adjustment $\pm 3\text{ }^{\circ}\text{C}$ (correction value for measured temperature)
- Valve protection function (once a week opening and closing of valve)
- Multi-colour status LED
- Continuous operation of LED possible

Technical data

Switching current:	max. 100 mA
Connected load:	20 W
Stand-by power:	< 0.5 W
Temperature range:	approx. +5 ... +30 $^{\circ}\text{C}$
Mounting height:	1.50 m
Number of valve drives:	1 ... 10
Cable length:	max. 100 m
Ambient temperature:	-5 ... +45 $^{\circ}\text{C}$
Stora/transport temperature:	-25 ... +70 $^{\circ}\text{C}$

Ref.-no.

Room thermostat (heating/cooling) 24 V

for covers ref.-no.: .. 1749 ..

RTR 241

Intended use

- Electronic room thermostat for controlling electrothermal valve drives for AC 24 V (e.g. ref.-no.: TSA 24 NC WW)
- Room temperature control in enclosed areas

Product characteristics

- Manually setting a comfort temperature
- Temperature limit of comfort temperature can be set
- Manually switching off the temperature control
- Input terminal for activation of reduction temperature (ECO) via central clock
- Input terminal for activation of cooling via central control
- Manual activation of cooling
- Internal temperature sensor
- Frost protection function
- Noiseless switching
- Temperature drop detection (call-up of frost protection temperature when window is open)
- Controller output working method: pulse width modulation (PWM) or two-point
- Adaptation to valves (normally open or normally closed)
- Offset adjustment $\pm 3\text{ }^{\circ}\text{C}$ (correction value for measured temperature)
- Valve protection function (once a week opening and closing of valve)
- Multi-colour status LED
- Continuous operation of LED possible

Technical data

Rated voltage:	AC 24 V SELV ($\pm 10\%$)
Mains frequency:	50/60 Hz
Switching current:	max. 1 A
Connected load:	max. 24 W
Stand-by power:	max. 0.1 W
Temperature range:	approx. $+5\text{ }^{\circ}\text{C}$... $+30\text{ }^{\circ}\text{C}$
Mounting height:	1.50 m
Number of valve drives:	1 ... 5
Ambient temperature:	$-5\text{ }^{\circ}\text{C}$... $+45\text{ }^{\circ}\text{C}$
Stora/transport temperature:	$-25\text{ }^{\circ}\text{C}$... $+70\text{ }^{\circ}\text{C}$

Temperature Management

Ref.-no.

Floor thermostat

for covers ref.-no.: .. 1749 ..

FTR 231

Intended use

- Electronic thermostat for controlling electric underfloor heating systems
- Floor temperature control in enclosed areas

Product characteristics

- Manually setting a floor comfort temperature
- Temperature limit of comfort temperature can be set
- Manually switching off the temperature control
- Input terminal for activation of reduction temperature (ECO) via central clock
- External sensor (ref.-no.: FF NTC) included in the scope of delivery
- Noiseless switching
- Frost protection function
- Feedback via status LED if external temperature sensor malfunctions
- Controller output working method: pulse width modulation (PWM) or two-point
- Interruption of continuous heating after one hour for 5 minutes
- Offset adjustment $\pm 3\text{ }^{\circ}\text{C}$ (correction value for measured temperature)
- Multi-colour status LED
- Continuous operation of LED possible

Technical data

Switching current:	10 A
Temperature range:	approx. $+5\text{ }^{\circ}\text{C}$... $+50\text{ }^{\circ}\text{C}$
Mounting height:	1.50 m
Connected load	
Ohmic load:	2300 W
Stand-by power:	max. 0.15 W

Thermal valve drive 230 V

TSA 230 NC WW

Intended use

- Thermal valve drive for operation of heating valves for individual room control
- For controllers and thermostats with switched output, 2-point regulation or pulse width modulation (PWM)

Product characteristics

- Normally closed (NC)
- With thermal extension element
- Forceless installation onto the valve using first-open function
- Re-open function: possible to open valve drive manually if required
- Visible position indication
- Noiseless
- Maintenance-free
- Including two adapters for adjusting closing dimension from 10.8 mm to 10.2 mm and 8.4 mm

Technical data

Rated voltage:	AC 230 V ~ (± 15 %)
Mains frequency:	50/60 Hz
Power consumption during operation:	1.7 W
Switch-on current:	150 mA
Valve lift:	max. 4.5 mm
Operating temperature at valve:	max. 100 °C
Run time for 4.5 mm valve lift:	approx. 3.5 min
Thrust power:	max. 110 N
Thread:	M 30 x 1.5
Closing dimension:	10.8 mm
Colour:	white (similar RAL 9016)
Mounting position:	all positions possible
Cable length:	1 m
Cable type:	PVC, 2 x 0.75 mm, white, H05
Protection class:	II
Protection level:	IP 54 (EN 60730-1)
Relative humidity:	max. 85 % (no condensation)
Ambient temperature:	0 ... +50 °C
Stora/transport temperature:	-25 ... +70 °C

JUNG Design: Purism and elegance

© FRANKLIN FRANKLIN PHOTOGRAPHY UK

The architectural firm Arney Fender Katsalidis created an exclusive residential complex in the London borough of Hammersmith and Fulham. The furnished luxury apartments Chelsea Island are characterised by clear forms and large glass windows with a synergy between the inside and the outside as a central element.

89 one- to four-room apartments, including eight penthouses, are located on a spacious area of around 5,000 square metres. Every apartment is flooded with natural light and offers a view of the Thames and the City of London. On the sixth floor, garden designer Neill Strain has created a private garden that offers a panoramic view of the desirable Chelsea Harbour area.

The interior design of the Chelsea Island apartments is a homage to British understatement. The style is purist and elegant – the best of British tradition and British lifestyle interpreted in a modern way. Comfort, attention to detail, elegance and pleasure are the four attributes that combine the charm of traditional British interior design in this building project.

JUNG Brand Store London

Experience aesthetics in the heart of Clerkenwell, London – an architectural melting pot. Roman heritage, Georgian house fronts, modern skyscrapers define the cityscape just like Victorian bay and sash windows.

Architecture icons like Lord Norman Foster and Zaha Hadid set up their offices here. The London architecture scene is characterised by innovation and internationality – a familiar setting for JUNG. In the creative district of Clerkenwell the German premium

manufacturer of modern building technology opened its first showroom in the United Kingdom. JUNG's design apartment shows its high-quality products and individual solutions to potential customers.

LS Design in aluminium
with "Out of Africa" laser engraving
by Alexander Brenner Architects

Individual switches and push-buttons

LASER ENGRAVING

The laser engraving also converts the contours of symbols, texts and ornaments due to the precise removal of the surface.

COLOUR PRINTING

The wear-resistant colour printing process offers many possibilities for individual design.

LABELLING

Clear and explicit: Labelling fields can be identified using labelling.

JUNG products gain individuality with the GRAPHIC TOOL at www.jung.de/gt. Depending on product, material and personal requirements, laser engraving, colour printing

or labelling are used. Using text, symbols and motifs, an individual design can be achieved and the functions behind them become clearer.
